

TDM - How To setup TV scheduling

Introduction

With TDM Digital Signage you have the ability to turn on/off your Sony & Philips Android device from the designer, this manual will explain which configurations are needed on the device and where the schedules can be created in the designer.

Requirements

If you want to configure TV scheduling for your device you need to meet the following requirements:

- Have administrator access to the TDM designer
- Have access to the settings of your Sony/Philips Android device

How To setup TV scheduling

How to configure the Sony Bravia for TV scheduling:

1. Go to Hotel / Pro mode (“ i+ / mute / vol+ / home”)
2. Go to Settings > Network > Home Network Setup
3. Select “IP Control”
4. Set Authentication to “None”
5. Set Simple IP control to “On”
6. Go to “Pro Settings”
7. Go to “Developer Options”
8. Enable “Power state control by apps”
9. Start “Pro Mode”

How to configure the Philips D-Line (Android 7 and above) for TV scheduling:

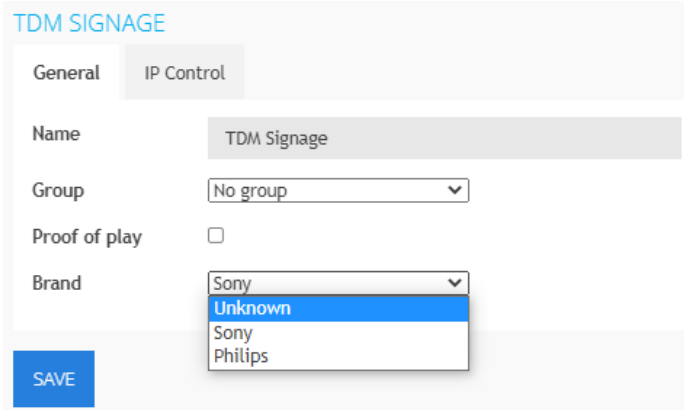

1. Select "Home" and go to:Advanced options -> Power save -> Enable mode 4

How to create TV schedules in the designer:

1. Please login to the designer with an administrator account: <https://designer.tdmsignage.com>
2. Select 'Player Overview'
3. Select the player you want to configure for 'TV Scheduling'

4. Make sure that the brand for the device is configured correctly.

A screenshot of the configuration form for 'TDM SIGNAGE'. The form has two tabs: 'General' and 'IP Control'. Under the 'General' tab, there are fields for 'Name' (TDM Signage), 'Group' (No group), 'Proof of play' (checkbox), and 'Brand' (dropdown menu). The 'Brand' dropdown menu is open, showing options: 'Sony', 'Unknown' (highlighted in blue), 'Sony', and 'Philips'. A blue 'SAVE' button is located at the bottom left of the form.

5. Next select "Config Panel".

6. Select the tab called "TV Scheduling".

7. Select the "+" button to create a new schedule.

8. A pop-up will be opened, configure the following fields:

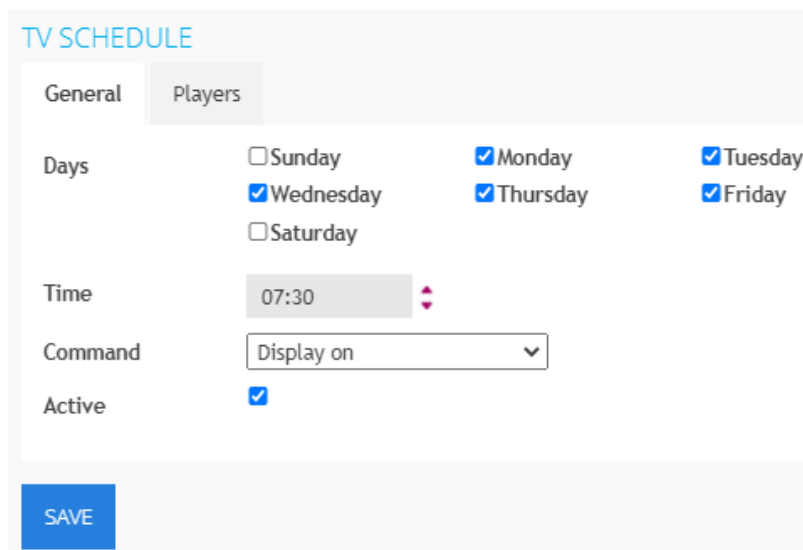

Days: Select the days where you want to execute the schedule

Time: Enter a time for the schedule to be executed

Command: Select the command you want to execute

Active: When this option is ticked the schedule will be active, unticked means the schedule is inactive

Players: In the tab called "Players" you can assign the players to the schedule.

The screenshot shows a configuration form titled "TV SCHEDULE". It has two tabs: "General" (selected) and "Players". The form contains the following fields:

- Days:** A group of checkboxes for the days of the week. Sunday is unchecked, while Monday, Tuesday, Wednesday, Thursday, and Friday are checked. Saturday is unchecked.
- Time:** A text input field containing "07:30" with a vertical double-headed arrow icon to its right.
- Command:** A dropdown menu with "Display on" selected.
- Active:** A checked checkbox.

At the bottom left of the form is a blue "SAVE" button.

Once all the options are configured select "Save". Repeat these steps in case you want to create multiple schedules. Please note that the TDM Android application will execute a check every five minutes to see if there are any new changes available regarding the TV schedules.
