

**TDM - How To** disable masterpage elements for specific pages

# Introduction

With TDM Digital Signage you have the ability to link a masterpage to your presentation. But in some situations you do not want to display all masterpage elements on your page. For example with a full screen video.

Because of this we have added an option to disable masterpage elements for specific pages, this guide will explain how the masterpage elements can be disabled.

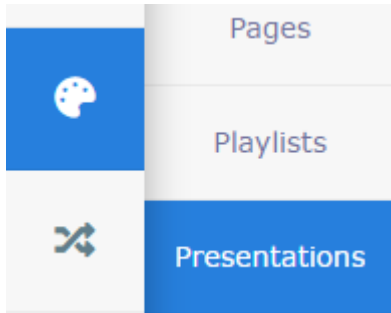

# Requirements

If you want to disable masterpage elements for specific pages you need to meet the following requirements:

- Have access to the presentation where you want to disable masterpage elements

# How To disable masterpage elements for specific pages

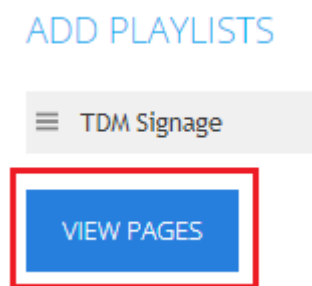

1. Please login to the designer with an administrator account: <https://designer.tdm signage.com>
2. Please select: Content Creation > Presentations

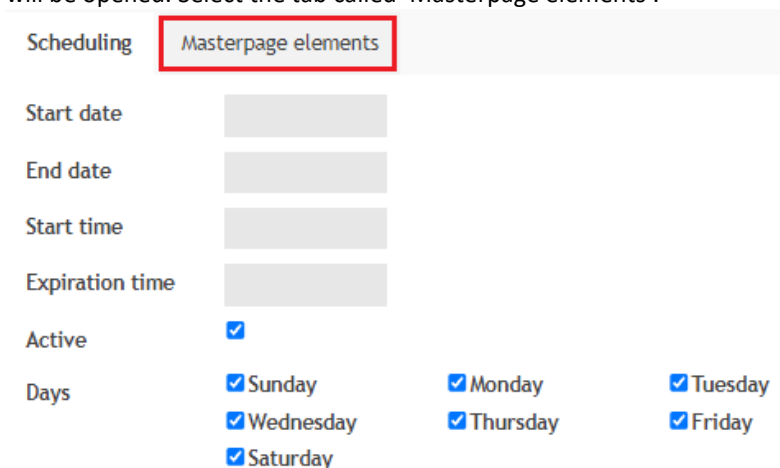

3. Select the presentation where you want to disable masterpage elements.

4. Once selected tick the button called 'View Pages'.

5. You will get an overview of all pages which are linked to your presentation, if you select a page a pop-up will be opened. Select the tab called 'Masterpage elements'.

6. In this tab you will see an overview of the masterpage elements linked to your presentation. Tick the elements you want to disable for this specific page, once you have finished your configuration press 'Save'.

Scheduling **Masterpage elements**

You can select a masterpage element which you can turn off while this page is being showed

(De)select all elements

TT Background	<input checked="" type="checkbox"/>
Tickertape	<input checked="" type="checkbox"/>
Logo	<input checked="" type="checkbox"/>

**SAVE**

You have successfully disabled masterpage elements for a page, you can repeat this process for each page.
