

TDM - How To schedule content from
the designer

Introduction

TDM allows you to schedule different presentations on specific times and/or days.

Unlike page or playlist scheduling, scheduled presentations will overrule the default presentation for that player.

It's even possible to schedule a presentation for different time zones, making sure a 12 o'clock scheduling will start the presentation at the same time of day all over the world.

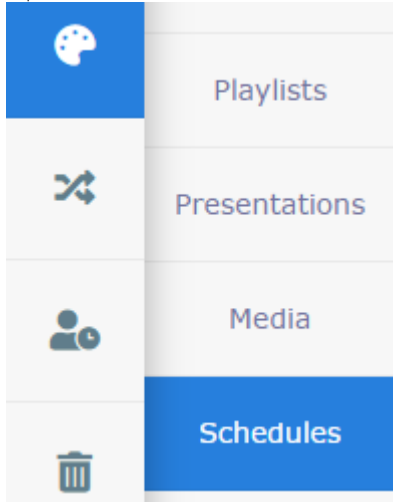

Requirements

If you want to schedule your content you need to meet the following requirements:

- Have administrator access to the TDM designer

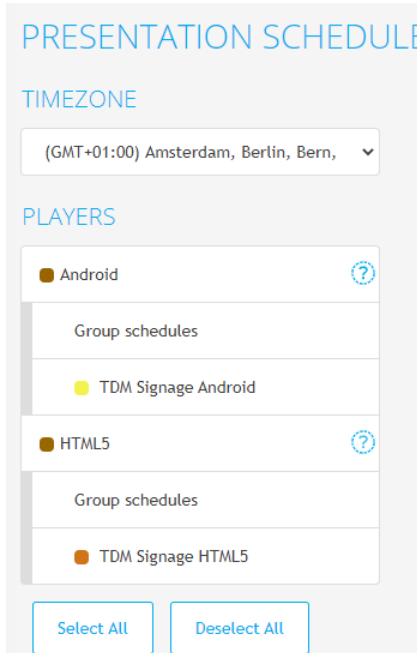

How To schedule content from the designer

1. Login to the designer with an administrator account: <https://designer.tdmsignage.com>
2. Open "Content Creation" and then select "Schedules"

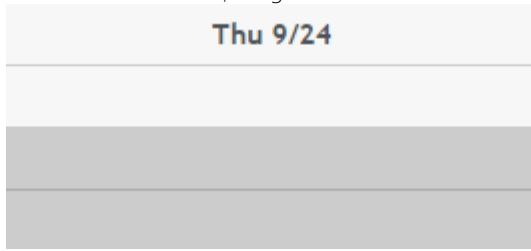

3. You will see an overview of all the content scheduled for your devices. Please note that it is possible to filter on a specific device or group. This way only the content for that specific group/player is displayed in the overview.

You can also switch between time zones to schedule content for locations in different parts of the world.

4. To create a schedule, drag a desired timeframe or double click anywhere on the calendar.

5. A new window will open where you can configure your schedule, the following fields need to be configured:
- Start date/time
 - End date/time
 - Player or Group
 - Presentation

A screenshot of an "EVENT" configuration dialog box. The title bar says "EVENT" with a close button (X) on the right. The fields are: "Start" with a value of "9/24/2020 7:00 AM" and a calendar icon; "End" with a value of "9/24/2020 8:00 AM" and a calendar icon; "All day event" with an unchecked checkbox; "Time zone" with a dark gray button; "Repeat" with a dropdown menu set to "Never"; "Player or group" with a dropdown menu set to "None"; and "Presentation" with a dropdown menu set to "None". At the bottom right, there are "Save" and "Cancel" buttons.

Once you have configured all the fields please select "Save".

You have now successfully created your content schedule. You can repeat the steps in case you want to create multiple schedules for your devices.
