

TDM - How To setup a Flickr data source

Introduction

TDM offers the ability to add external data sources. With these data sources TDM offers the ability to display real-time information within your presentation. TDM offers support for the following external data sources:

- Facebook
- Twitter
- Instagram
- Yahoo Weather
- Office365 Calendar
- Google Calendar
- **Flickr**
- Yammer
- LinkedIn
- Exchange
- Power BI
- NS
- Axis (People Counter camera)
- HikVision (People Counter camera)
- Amadeus
- Realworks

This guide will explain how the Flickr data source can be added.

Requirements

If you want to setup a Flickr data sources you need to meet the following requirements:

- Have administrator access to the TDM designer

How To setup a Flickr data source

1. Please login to the designer with an administrator account: <https://designer.tdmsignage.com>

2. Select "Config Panel".

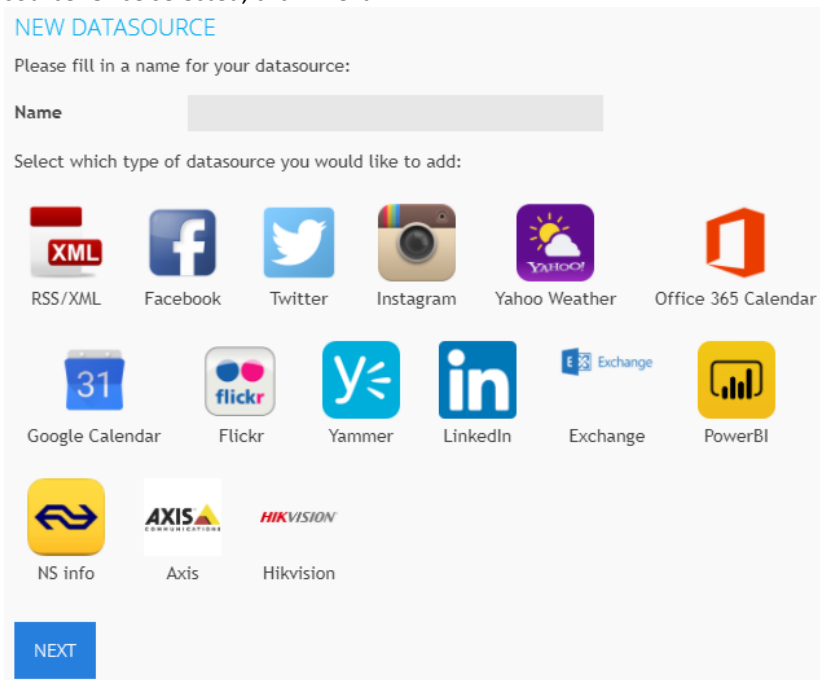

3. Select the tab called "External Data"

4. Select the "+" button on the right side to create a new data source.

5. In the pop-up which will open you can fill in a name for your data source and then select the "Flickr" data source. Once selected, click "Next".

- In the next window you can choose the account or hashtag you want to use for your data source. You can also choose to enable “All tags in 1 picture”.

All tags in 1 picture: Select this if you want to show all pictures that match all your search words.

Once you have configured the data source select “Save” to save the data source.

- Now that you have successfully created a Flickr data source, it is possible to preview the information of the data source with the “eye” icon in front of the data source.
