

TDM - How To enable Proof of Play

# Introduction

TDM gives users the possibility to save statistics about the pages shown on your devices, this functionality is called Proof of Play. With this functionality you will get a better view about which page is displayed the most frequent and which page is displayed the longest. It's also possible to export the data to CSV or Excel.

This guide explains how to enable Proof of Play for your device.

# Requirements

If you want to enable Proof of Play you need to meet the following requirements:

- Have administrator access to the TDM designer

# How To enable Proof of Play

Proof of Play can be enabled for separate devices; this means you have the possibility to choose for which device you want to receive statistics.

1. Please login to the designer with an administrator account: <https://designer.tdm signage.com>
2. To enable "Proof of Play" we need to go to the "Player overview", this button is available from the dashboard after you have logged in.

3. Please select the player where you want to enable "Proof of Play".

TDM Signage

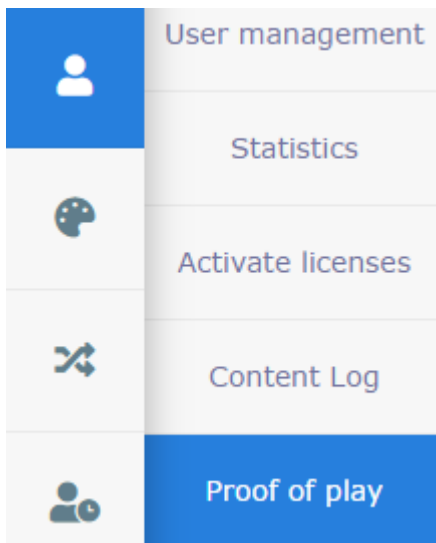

PC

4. In the pop-up which appears please enable the option called "Proof of Play" and select "Save".

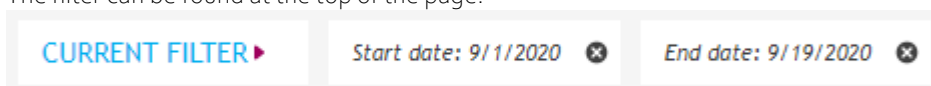

**Proof of play**

5. From now on statistics will be collected for the device, the "Proof of Play" overview is available when selecting: Administration > Proof of Play:

Please note that it is possible to filter on a specific date and that the statics can be exported into a CSV or Excel file.

The filter can be found at the top of the page:

The export function can be found at the bottom of the page:
