# New features

Below an overview of the new features which are part of TDM5.1:

Item:	Function description:
<b>Windows player</b>	With the launch of the PC Player, we now offer the ability to play your content on any PC suitable for digital signage. This new player opens up opportunities for even more flexibility in how and where you want to manage your digital displays. Whether you have a smaller setup or want to implement a complex network structure, the PC Player provides a stable solution without relying on specialized hardware.
<b>TDM4 to TDM5 import</b>	We are proud to present our new content migration tool, which makes it easy to transfer your content from TDM4 to TDM5. With user-friendly features and reliable support, you can seamlessly make the transition and benefit from the enhancements in TDM5. Take the leap to a more efficient digital environment today!
<b>Single Sign-on (SSO)</b>	Safety and ease of use are central to our new SSO integration. Thanks to this feature, users can easily log in with their existing company account, creating a streamlined process and an improved user experience. No more hassle with multiple passwords—one click, and you have access to your digital signage system!
<b>Google Drive</b>	With Google Drive, you can now securely store and manage all your content in the cloud within the familiar Google Drive environment. Connecting your signage software to Google Drive makes it easier to centrally manage content within your trusted platforms.
<b>TikTok integration</b>	We've added the TikTok Integration for those looking to enrich their digital signage with popular and trending content. Whether you want to support promotions or events with TikTok videos, you can now easily integrate and display TikTok videos on your screens. Stay on top of the latest trends and keep your content dynamic and relevant.
<b>Vimeo integration</b>	With the new Vimeo Integration, you can now fetch and display videos directly from Vimeo on your signage screens. Whether you want to use corporate videos, tutorials, or marketing materials, Vimeo offers an excellent way to stream your visual content in high quality without hassle.
<b>SharePoint integration</b>	With the new SharePoint integration, you can now easily retrieve and display news posts from your SharePoint platform on your digital screens. This makes it ideal for organizations that want to quickly and efficiently share important updates, news, or announcements with their employees or customers. It's an easy way to centrally manage relevant information and automatically display it without manual intervention.

# Precautions and restrictions

Below an overview of the precautions and restrictions of TDM5.1:

Component:	Description:	Status:
<b>Scheduling</b>	When you would like to use power on/off schedules for Sony Bravia displays the following setting is required: Settings > Apps > Special App Access > Energy Optimization > TDM Player for Android > Not Optimized  Other brands will display a pop-up to disable the energy optimization permission, in case the pop-up is not shown the permission needs to be disabled manually.	Added the permission in the 'TDM5 - How to configure a Sony Bravia with TDM5' manual.
<b>Scheduling</b>	Currently the schedules for powering on/off can only be used on displays, TDM5 does not yet support this feature for tablets and players.	Will be discussed for future versions
<b>Scheduling</b>	First save attempt for players and groups will fail, needs a manual reload and another save after selecting (player(s)/group(s)).	Will be solved in the next patch
<b>TDM4 Importer</b>	The TDM4 importer does not import the borders of a table element. This needs to be set manually after import. It can also happen that the data is being shown in the wrong cell.	Will be solved in the next patch
<b>TDM4 Importer</b>	The TDM4 import does not automatically link the data source to a tickertape element. This needs to be set manually after import.	Will be solved in the next patch
<b>TDM4 Importer</b>	When you use search for media in the TDM4 importer and you select a folder, no content is shown.	Will be solved in the next patch
<b>Free trial</b>	It is possible to continue with the free trial request without logging in. This will result in an error when creating the trial.	Will be solved in the next patch
<b>Data sources</b>	The TikTok integration is not yet available in TDM5, this because we are currently waiting for TikTok their app approval. Once our TikTok integration has been approved the integration will become visible in TDM5.	Waiting for feedback
<b>Data sources</b>	The SharePoint data source requires a manual refresh of the page after you have logged in with your account. Without this manual refresh the SharePoint sites will not be loaded	Will be solved in the next patch
<b>Pages</b>	When using 'Import page', the imported page is always saved to the root instead of the folder you have open.	Will be solved in the next patch
<b>Pages</b>	The tickertape element does not yet support the 'SlideUp' option.	Will be solved in the next patch

# Overview of TDM5.1 items

Below you can find an overview of all items which have been handled for TDM5.1:
