

TDM5 - How To set default content
for players

Introduction

TDM5 supports all kinds of devices, this can be a Sony Bravia, Philips D-Line, Samsung display or an Android/PC player. This manual explains how default content can be configured, this content will automatically be pushed once a new device has registered in your TDM5 environment.

This means that every new player will automatically display the configured default content instead of the default TDM5 page.

Requirements

If you want to set default content for new players you need to meet the following requirements:

- Have access to: Designer > Players

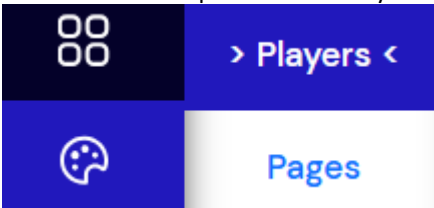

How To set default content for players

1. Login to your TDM5 environment.

2. Select “Designer”.

3. Select the menu option called “Players”.

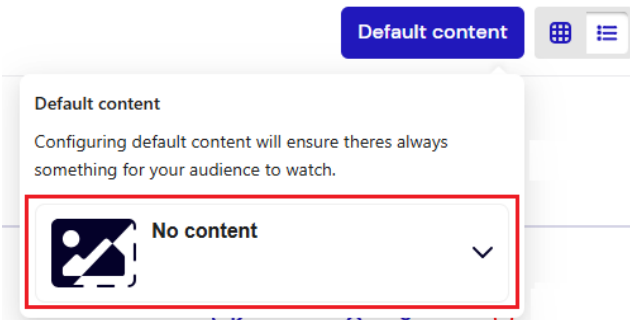

4. Select ‘Default Content’ in the top right corner.

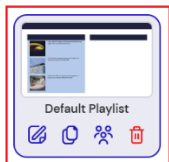

All players

5. Select “No Content” to open the library, from here you can add the content you would like to configure as default.

6. Select the content you would like to configure as default and press “Select Content”.

7. Now you have successfully configured default content, this will automatically be pushed once a new device has registered in your TDM5 environment.
