

TDM5 - How To Import/Export pages

Introduction

TDM5 offers the ability to create your own designs, this can be done using elements. Each element has its own properties which can be configured. With these elements you have the ability to create content based on your needs.

In some cases you would like to use your content in a different environment. For this we have added an import/export option.

Requirements

If you want to import/export content you need to meet the following requirements:

- Have access to: Designer > Pages and be able to create or edit a page.

How To export a page

1. Login to your TDM5 environment.

2. Select “Designer”.

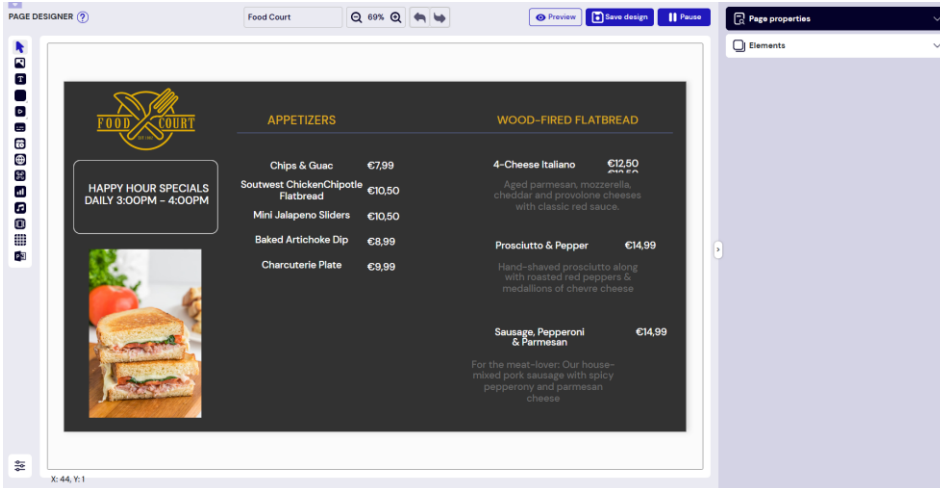

3. Select the menu option called “Pages”.

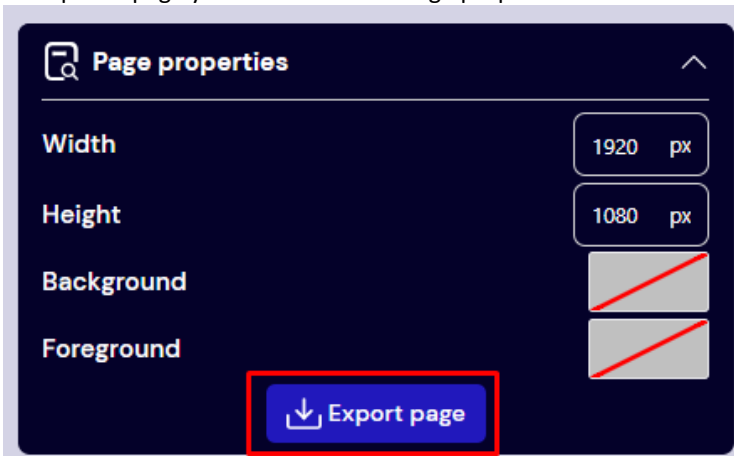

4. Open an existing page by selecting ‘Edit’.

5. You will be navigated to the content editor, from here you can design your page.

6. To export a page you need to select ‘Page properties’ which is located in the menu on the right.

How To import a page

1. Login to your TDM5 environment.
2. Select “Designer”.

3. Select the menu option called “Pages”

4. Select 'Import page' in the top right corner

5. Navigate to the folder where your exported page is stored and select it.
By default the exported page will be downloaded to your downloads folder.

6. After selecting the file the page will be imported, you will automatically be navigated to the imported page as soon as the process has finished.

Once you have finished this step the page has been imported, you can repeat these steps in case any other pages need to be imported as well.
