

TDM5 - How To create a content schedule

Introduction

TDM5 allows you to create schedules for specific times and/or days. A schedule can be linked to content but also to an action like powering off your device. With this functionality you can schedule actions for events or other occasions without having to change the state of the devices manually.

This article will describe how a content schedule can be created.
Additional articles regarding schedules can be found in our knowledge base.

Requirements

If you want to create a content schedule you need to meet the following requirements:

- Have access to: Devices > Schedules.

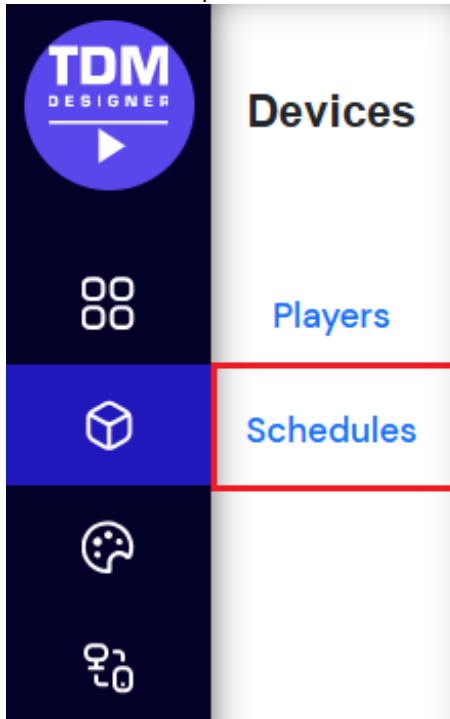

How To create a content schedule

1. Login to your TDM5 environment.

2. Select "Devices".

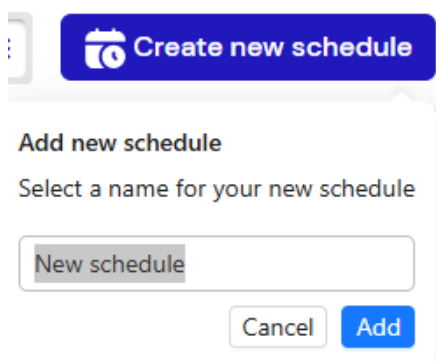

3. Select the menu option called "Schedules"

4. Select the option 'Create new schedule' in the top right corner.

Fill in a name for your new schedule and press 'Add'.

5. In the next window, select the Active periods (interval).

Edit Schedule ?

Name

Active periods
When should this schedule be active? >

State
In which state should the player(s) be when the schedule is active? >

For the 'Active periods', you can choose between once, daily, weekly.

Once

Daily

Weekly

After selecting the interval you can select the preferred time for your contents schedule.

Daily:

Daily

07:00

20:00

Weekly:

Weekly

Monday

07:00

15:00

Please note:

If you want to set the content schedule for multiple days of the week, you can add more intervals.

Weekly

Friday

07:00

15:00

Weekly

Friday

07:00

17:00

Weekly

Friday

07:00

15:00

Weekly

Friday

07:00

15:00

Weekly

Sunday

07:00

18:00

6. Once the preferred interval has been set, you can set the state of the schedule to 'Content'.
