

TDM5 - How To edit a schedule

Introduction

TDM5 allows you to create schedules for specific times and/or days. A schedule can be linked to content but also to an action like powering off your device. With this functionality you can schedule actions for events or other occasions without having to change the state of the devices manually.

This article will describe how a schedule can be edited.
Additional articles regarding schedules can be found in our knowledge base.

Requirements

If you want to edit a schedule you need to meet the following requirements:

- Have access to: Devices > Schedules.

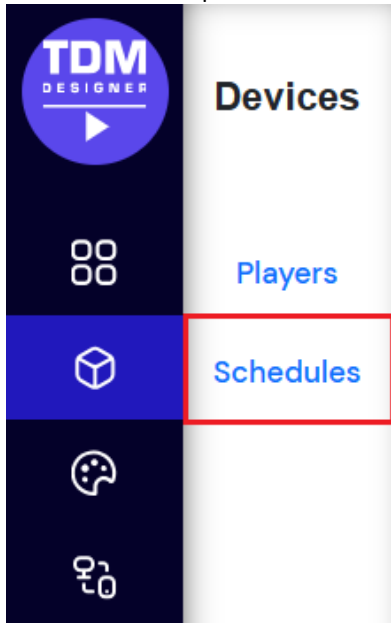

How To edit a content schedule

1. Login to your TDM5 environment.

2. Select "Devices".

3. Select the menu option called "Schedules"

4. Select the option 'edit' to edit a schedule.

5. You are now able to edit the schedule, once you have edited the schedule you can press 'Save' to save the changes.

You have now edited an existing schedule, you can repeat these steps to edit any additional schedules.
