

TDM5 - How To import demo templates

Introduction

TDM5 offers the ability to create your own designs, this can be done using elements. Each element has its own properties which can be configured. With these elements you have the ability to create content based on your needs.

Next to this we have a library of demo templates, this manual explains how the demo templates can be downloaded and imported into your environment.

Requirements

If you want to import demo templates you need to meet the following requirements:

- Have access to: Designer > Pages

How to download a demo template

1. Navigate to <https://tdm5.tdm signage.com/pages>. Here you will see an overview of all available demo templates.
2. Choose which template you want to use and click 'Download'.

3. The file will download as a .zip file. By default it will be downloaded into the 'downloads' folder.

How to import a template

1. Login to your TDM5 environment.
2. Select "Designer"

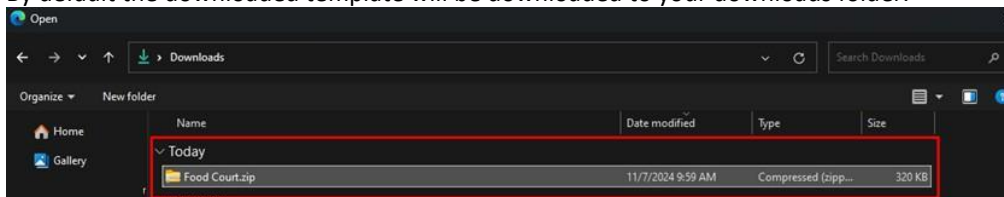

3. Select the menu option called "Pages"

4. Select 'Import page' in the top right corner

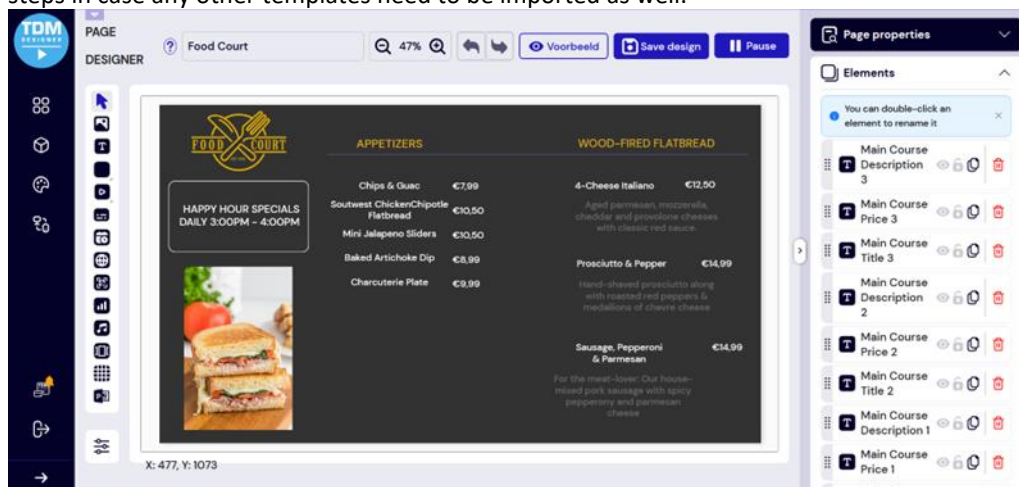

5. Navigate to the folder where your downloaded template is stored and select it.
By default the downloaded template will be downloaded to your downloads folder.

6. After selecting the file the template will be imported, you will automatically be navigated to the imported template as soon as the process has finished.

Once you have finished this step the template has been imported, you can repeat these steps in case any other templates need to be imported as well.

You have now successfully imported a template to the TDM5 designer.
