

TDM5 – Subscriptions

Introduction

TDM5 offers different kind of subscriptions and modules which can be ordered. This can be done directly from our website or after you logged into your TDM5 environment.

This manual will explain the differences between the TDM5 subscriptions.

TDM5 - Subscriptions

TDM5 offers three different kinds of subscriptions:

Essential:

With the 'Essential' subscription you have access to the content creator, content scheduler and you have the ability to link Dropbox and OneDrive as a media storage. With the 'Essential' subscription you can only use the Android based devices.

Small Business:

This has all the features from 'Essential', next to this you have the ability to create custom data sources, use your own fonts, mail to signage, content log, use our connected apps and make use of the Windows based player.

Enterprise:

The 'Enterprise' subscription contains all functionality available in TDM5, features which will become available in the future will automatically become part when using the 'Enterprise' subscription.

Below an overview of the differences of these subscriptions:
