New features

Below is an overview of the new features that are part of TDM5.5.1:

Item:	Function description:
Sync play	TDM5 now makes it possible to synchronize playback across multiple devices, regardless of the brand or device type. Whether you're working with displays, players, or a combination of different hardware, content can now be played back in sync across your entire setup. This makes it easier to create a consistent and seamless experience across multiple screens — even in environments with a mix of different devices and manufacturers.

Precautions and restrictions

Below is an overview of the precautions and restrictions of TDM5.5:
